

# Corporate Leaders Donate Van to transport Veterans for Job Interviews

The Veterans Employment Alliance is pleased to announce it has received the donation of a Van from five (5) business leaders in Milwaukee County.

The Van will be a great benefit to help Veterans that have completed our “FROM DEPLOYMENT TO EMPLOYMENT” program and have interviews outside the Metro Bus System. Many of our Vets receive career opportunities in Waukesha, Racine or Kenosha Counties and have no way of getting to the interview. Once hired, they need to be transported to work until they can afford to purchase a Vehicle.

The Founder of the VEA Center stated, “This donation will be a valuable asset that increases the services we can provide to Veterans & Families in Crisis as we help them rebuild their lives.”

The VEA is also working with other business leaders in SE Wisconsin to provide donated or low cost cars that will be provided to their clients.

## ***About the Veterans Employment Alliance (VEA)***

The Veterans Employment Alliance helps Veterans rebuild their lives upon return from deployment. The nonprofit organization has helped thousands of Veterans and hundreds of family members of Veterans put their lives back together in many ways. At its core, the VEA is an organization that was created by a Veteran that spent three (3) years homeless on the streets struggling to put his life back together and discovered through this experience how difficult it is without the proper guidance. The VEA, now in its thirteenth (13) year, continues with gifts from generous people committed to helping local Veterans. For donors, the VEA serves as a philanthropic advisor. For the community, the VEA serves as a solid resource for Veterans and a civic leader. Through the support of its donors and fundraisers, the VEA has been able to address some of the community’s most pressing needs, including homelessness, employment, housing and education.
